Played just the time to understand I didn't know what I was doing - literally. I also published a "first look" video in the community hub with my gameplay and a silly meme at the end of it to explain my feelings - no intentions to just speak ill of the game, but still a negative vibe for me.

Yesterday my vid was banned and today I know (by Steam support), it was on game's dev, not an actual Steam mod and they cannot deal with it - I should contact developers. Since I already have been in a similar situation not long ago and since this is the discussion forum's status ( <https://i.imgur.com/V3jRYvG6.jpg> ) and video hub status ( <https://i.imgur.com/Vo1mMc88.jpg> ) as [today, I won't bother with that.](#)

[I know this feels like a revenge review but I hope I still have the right to speak my mind. Banned video: https://www.youtube.com/watch?v=As-trY71Rk0. This game is pretty cool in concept and I enjoy the class system but buy it from SBM or get it in a bundle because you won't get much out of it. You'll be lucky to find anyone ever playing. There are groups that schedule events for matches but due to life a lot of poeple can only join up for a good game or two before there are so few people you can't play. I like it but online only is like wtf. Once you play it you'll see why it probably doesnt have AI, you can't fly and fight at the same time, you just can't. I fell out of the sky constantly just trying to use the airships cannons. So I just stuck to flying mostly, gliders are sweet and such. I only paid \\$1.35 for this on SBM but... but it sucks.. Lezzo](#)

[6/10. Bad game.](#)

[It's good for trading cards. Too scary to play. At start there is dark, some guy on toilet. And dark. Nope :D. Well it isnt bad game. Interesting concept but gameplay is too shallow and short. Geting all achievements took me under an hour and it wasnt fun.. I love watching people who are nerds that get paid playing a game. 10/10 would watch again and cry every time.. Bought it for 75% off. But it's not what I thought it is.](#)

[Just not my kind of game.. Great sidescroller! Love the mechanics, controls are responsive and smooth. The theme is great. Every patch I've seen sice I've bought it has added new stuff. I recomanded to anybody who likes classics sidescrollers.. It's so cute!](#)

There is a random game-breaking bug where you come into a system and it says you are under attack. However there are no enemies anywhere on the screen and you are not allowed to move from that location. So far I have died once to enemies and 4 times due to this bug. Fix the bug and I will change my review, otherwise I can't recommend this game.. boring. not recommended.. This game is amazing. Great story which is sadly on the short side. However the game is completely free, so no reason to complain about that.

I hope they will create a longer game like this and I will gladly pay for it.

I recommend any to play this game, seeing as it's free there is really no reason not to!. I honestly thought that this was gonna be a bad game, but against my gut feeling, I purchased it, and surprise surprise, It's actually really good. Could use a lot of work on animations, but what it's got going for it is that you'll be scared \u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665 during it. I imagine this is how soldiers in vietnam felt when someone shot at them, but they couldn't see them because of all the vegetation.. My first launch of the game lasted 3.5 hours (oopsss past the refund time) and that was just one stretch of a game. That could be a sign of the easy learning curve of the game, considering such a bad gamer as myself. The game accused to be "too random" by most of the users and I guess that's the whole point of this "secret agent headmaster role-play". The decisions you make are based on those unknowns, are the game is about to reveal these unknowns as much and as fast as you can. I do not regret the price I paid for an early access game.

#### PROS

- + Niche game
- + Nice music
- + Simple controls
- + Atmosphere

#### CONS

- More content (characters, countries, relations, technologies, events etc.) needed
- The game is quite demanding on system resources although there are no fancy animations or such

What would be awesome to see:

- Animated character profiles (when they are in hospital, when they are hacking, when they fail, some permanent scars, mood in the diplomacy/interrogation screen)
- Proactive interaction with organizations/influence groups/armed groups
- Multiplayer!!!. brb looking for the keynotes of the piano bgm~. This game has great potential, but right now it's unplayable. Servers are dead i mean zero ppl playing. This game need big patch.. developers need speed up, because game market is full of games with survival theme.

#### PROS

- ✓building
- ✓medival
- ✓rpg type
- ✓mat grinding
- ✓graphic style
- ✓puzzles
- ✓online/coop/single

#### CONS

- ✗bugs
- ✗more bugs
- ✗more survival
- ✗combat
- ✗skill tree
- ✗character costum.
- ✗decoration
- ✗limited place to build
- ✗dead world (more NPC)
- ✗more crafts

- 
- ✗more building
  - ✗more items
  - ✗more enemies
  - ✗better spawn resources
  - ✗unpleasant illogical things

I know.. its early access, but as i said game market is full of games like this one.

RIGHT NOW, I DONT RECCOMEND THIS GAME. SAVE MONEY AND WAIT!. starts like a hapay fun game but the becomes a depresing fun game but still fun 10/10 hope the creator updates it make a triquel or makes a tottaly new one and is a good idea too revisit level 100 when you beat it. I wish somebody out there can tell me why the heck this game will not even start , much less run!! The cursor will not move from the get go and the keyboard is useless also with one exception . I can press P which is for pause , instead I at least get a picture inside the ship. Isn't there a patch somewhere? I have tried to contact steam, valve and the maker this game with no replys or results. I never heard of a company the will not reply to emails or have a phone contact number. And no , even if they did or do, I am not paying for support when it is there fault. All my other games play just fine and are a lot more demanding than this one.
